### MODERATE

Pain is noticeable, but tolerable. It can be ignored and doesn't interfere with your daily activities.

Cours wants to modify your training plan with the injury information you've provided.

This will modify your entire training schedule to help ease your training while you are injured.

Barry injured himself during his evening workout. He opens his app so he can modify his personal training plan.

Barry opens the Training Schedual tab and chooses the Add An Injury option.

The app prompts Barry to enter the type of injury that he has. Barry tells the app that he has shinsplints.

The app then prompts Barry to enter the injury's severity. He tells the app that it's a 4/10; it hurts but not too badly.

The app knows that Barry took a two month break from the app. It uses this data in conjunction with Barry's injury data in order to tabulate changes to his training plan. Before it makes these changes, it prompts Barry to confirm that he

Finally the app updates Barry's information and provides him with his modified training schedule.

DESCRIPTION HEADER GOES HERE

BODY

There are many variations of pass-ages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable. It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', which doesn't look at all realistic.
